Dear Chair Gonzalez Fletcher:

The above-listed organizations are OPPOSED UNLESS AMENDED to SB 623 (Monning) and OPPOSE THE TAX ON WATER BEING ADDED TO SB 623.
This bill would establish a fund to be administered by the State Water Resources Control Board (SWRCB) to assist those who do not have access to safe drinking water. The organizations listed on this letter agree with the intent of the bill. The lack of access to safe drinking water in certain disadvantaged communities is a public health issue and a social issue that the State needs to address.

As the Legislature departed Sacramento for Summer Recess, the intended funding sources for SB 623 had yet to be identified in the bill. The Author is adding the funding sources just prior to the Assembly Appropriations Committee voting on the measure. Senator Monning is adding two types of funding: 1) fees related to fertilizer and dairies to address nitrate contamination; and 2) a state-mandated tax on water that the bill would require local water agencies to assess on their local ratepayers and send to Sacramento. The above-listed organizations oppose the proposal for a tax on water.

**PROBLEMS WITH A TAX ON WATER:** Following are examples of problems with a tax on water:

1) Requiring local water agencies and cities across the state to impose a tax on water for the State of California is highly problematic and is not the appropriate response to the problem;

2) State law sets forth a policy of a human right to water for human consumption that is safe, clean, affordable and accessible. **It is not sound policy to tax something that is a human right;**

3) Adding a tax on water works against keeping water affordable for all Californians; and

4) It is inefficient for local water agencies across the state to collect the tax and send it to Sacramento.

Instead of turning local water agencies into taxation agencies for the state, the above-listed organizations suggest the following funding solution:

**FUNDING SOLUTION:**

1) **Safe Drinking Water State Revolving Fund (SRF)** – this federal funding can be used to fund capital costs;

2) **General Obligation (G.O.) Bonds** – SB 5 (de León) proposes $175 million for safe drinking water and two new bond initiatives have been filed with the Attorney General which both propose $500 million for safe drinking water. All of these bonds propose to prioritize the drinking water funding to disadvantaged communities (DACs);

3) **Ag Funding** – the nitrate-related fee(s) that is expected to be added to the bill can be used for replacement water, including point-of-use and point-of-entry treatment, for nitrate contamination; and

4) **General Fund** – General Fund funding can fund the non-nitrate operation and maintenance (O&M) costs needs at public water systems in certain DACs.

Everyone in California should have access to safe drinking water. The fact that a small percentage of Californians do not makes this issue a public health and social issue for which the General Fund is an appropriate source of funding as part of the above-suggested funding package.
AMENDMENTS: In addition to including the General Fund as a funding source instead of a tax on water, the organizations listed above are suggesting the amendments shown on the attachment to address various concerns regarding this funding measure.

The above-listed organizations urge your “No” vote on SB 623 unless the bill does not include a tax on water and these concerns are addressed.

If you have questions, please contact Cindy Tuck, Deputy Executive Director for Government Relations, Association of California Water Agencies at (916) 441-4545 or at cindyt@acwa.com.

cc: The Honorable William W. Monning
    Honorable Members, Assembly Appropriations Committee
    Ms. Kathy Smith, Senior Legislative Consultant, Office of Senator William W. Monning
    Ms. Jennifer Galehouse, Deputy Chief Consultant, Assembly Appropriations Committee
    Mr. Jared Yoshiki, Consultant, Assembly Republican Caucus

SB 623 (MONNING) AMENDMENTS SUGGESTED BY
WATER AGENCIES AND WATER ORGANIZATIONS
LISTED ON THIS LETTER

1) Do NOT include a tax on water (i.e., the proposed drinking water “fee.”) Instead, the bill should propose General Fund funding as the non-nitrate funding source in the bill.

2) Exclude capital costs as an eligible funding category and focus on funding operation and maintenance (O&M) costs, which are difficult to fund through G.O. bonds and cannot be funded with Safe Drinking Water State Revolving Fund (SRF) dollars. (G.O. bonds and the SRF are effective in funding capital costs.)

3) Limit the funding to disadvantaged communities (DACs) and low income individual domestic well users that do not have access to safe drinking water, consistent with 4) below.

4) Exclude individual domestic wells and “state small water systems” (with 5 to 14 connections) as eligible funding categories (with one exception for nitrate). Data is lacking to support a credible needs assessment. For example, the state does not require owners of private wells to sample their wells, and consequently a comprehensive database for these groundwater sources does not exist. The bill should explicitly exclude these two categories from funding with the exception that funding could be made available for replacement water for individual domestic wells or state small water systems in rural areas of the state for which the local health officer has certified that data documents that the wells for which funding is being sought in that area are contaminated with nitrate. The proposed definition of “replacement water” should be narrowed to make this exception workable. (Bottled water, point-of-use treatment and point-of-entry treatment are reasonable parts of this proposed definition.)

5) Make sure the funding goes to address situations where the water is not safe. The proposed language In Section 116769 references: A) “systems and populations potentially in need of assistance”; and B) systems that “may be at risk of failing.” Funding for safe drinking water should go to where there are real problems as opposed to going to where there is a chance of a problem.

6) Focus on safe drinking water and recognize that affordability issues are being discussed in the SWRCB’s AB 401 implementation process. The language should be deleted from Section 116769 which would include in the needs assessment all community water systems in DACs that charge fees that exceed the affordability threshold in the Clean Water State Revolving Fund Intended Use Plan (i.e., fees that equal or exceed 1.5 percent of the median household income). The SWRCB is currently developing a plan for a low-income water rate assistance program pursuant to AB 401 (Dodd, 2015), and there many questions being raised about how affordability thresholds should be determined.

7) Clarify what is intended by the proposed authority for the SWRCB to take incidental action as may be appropriate for adequate administration and operation of the fund. Instead of simply including this rather vague provision, the bill should be specific as to what this proposed authority is intended to cover.
