CITY OF BEVERLY HILLS ANNOUNCES LAUNCH OF CLEAN POWER ALLIANCE

Beverly Hills, Calif. (December 13, 2018) - Residents and businesses in the City of Beverly Hills will soon enjoy the advantages of clean, renewable power at competitive rates. Starting in February 2019, Clean Power Alliance will be the new electricity provider for the community.

Clean Power Alliance is a public agency made up of 31 local governments across Los Angeles and Ventura counties working together to bring clean, renewable power choices to communities. Clean Power Alliance purchases clean power and SCE delivers it - nothing else changes. SCE will continue to send just one bill and will be responsible for resolving any issues with electricity service.

"We are excited to be part of this innovative opportunity to begin a new era of clean power distribution," said Mayor Julian Gold. "Beverly Hills is committed to sustainability and this new enterprise allows our community to further champion the environment."

Beverly Hills customers will be automatically enrolled in Clean Power Alliance's Clean Power rate option, which provides 50% renewable content. With this option, bills will remain approximately the same or less than SCE's current rate at 35% Green. Customers may also select options for Lean Power (36%) or Full Green Power (100%).

Customers who have enjoyed special rates or programs in the past, such as CARE, FERA, Medical Baseline, Level Pay or Summer Discounts will still have access to those offerings.

Customers in Beverly Hills will receive a total of four notices via mail before and after the switch from SCE to Clean Power Alliance for electricity generation. Service for residential customers will begin in February 2019, and customers will receive their first notice in December 2018. Clean Power Alliance service for non-residential customers is scheduled to begin in May 2019.
