Re:   AB 1196 (Gipson) Peace officers: use of force
City of Beverly Hills – Support

Dear Assemblymember Gipson,

On behalf of the City of Beverly Hills, I am pleased to write to you in SUPPORT your AB 1196 which would prohibit a law enforcement agency from authorizing the use of a carotid restraint or a choke hold.

In the wake of the death of George Floyd and the subsequent nationwide protests police departments in several major cities, including the cities of San Diego and San Francisco, have taken steps to prohibit the use of carotid chokeholds as a means of subduing a suspect. The carotid restraint is one of the most commonly used strangleholds and is when a peace officer applies pressure on either side of the windpipe, but not on the windpipe itself, to slow or stop the flow of blood to the brain via the carotid arteries. While designed to render a subject unconscious when improperly applied, or when a subject has an underlying physical condition such as coronary artery disease, can make this form of restraint the potentially lethal. In the case of Eric Garner, former New York City Police Commissioner James O’Neill said that the officer’s failure to relax his grip while subduing Mr. Garner with a carotid chokehold triggered a fatal asthma attack.

As we have seen time and again the use of carotid chokeholds can go terribly wrong, resulting in the deaths of suspects when applied incorrectly. There is no statewide policy regarding the use of carotid chokeholds the policies regarding their use can vary greatly between different law enforcement agencies. This can lead to confusion regarding their use as officers move from one department or agency to another.
For these reasons, the City of Beverly Hills would be pleased to SUPPORT your AB 1196. Thank you for authoring this important measure and for your consideration.

Sincerely,

[Signature]

Lester J. Friedman
Mayor, City of Beverly Hills
