BEVERLY HILLS TO PROHIBIT THE USE OF MOTORIZED SCOOTERS FOR SIX MONTHS

Beverly Hills, CA – During a special meeting tonight, the Beverly Hills City Council voted 4-1 to prohibit certain shared mobility devices, specifically motorized scooters, within City limits.

The ordinance prohibits the devices from being placed in any public right-of-way or on public property, operated in any public-right-of-way or on public property, or offered for use anywhere in the City.

The majority of the Council cited concern for public safety and a lack of any advanced planning and outreach by the motorized scooter companies as the primary reasons for the new ordinance.

Beverly Hills Police will enforce a zero-tolerance policy on the use of motorized scooters throughout the City. This will include impounding the devices and issuing citations related to vehicle code violations resulting in fines.

The majority of the Council expressed an interest in meeting with representatives from the motorized scooter companies to establish clear guidelines for possible future use of the devices within the City.

The use of motorized scooters in Beverly Hills has dramatically increased in recent weeks with the Police Department issuing warnings and citations for riders not wearing helmets, driving on sidewalks in a business district or not possessing a valid driver's license. Police have responded to several injury involved vehicle collisions involving motorized scooters. Police have also removed scooters from sidewalks and streets that obstructed the normal movement of traffic and created a hazard.
