Citywide Survey of Beverly Hills Sidewalks Underway

Beverly Hills – As part of a program to repair and maintain the sidewalks in Beverly Hills, a survey using both technology and manual observations is taking place throughout the City. The program is a proactive measure to ensure that Beverly Hills' sidewalks are safe for pedestrians.

An All-Terrain Vehicle (ATV) equipped with laser cameras will travel on residential and commercial sidewalks taking photographs. The driver will take notes on damage such as holes in the pavement and raised concrete panels. The data collected will be compiled into a GIS (Geographical Information System) database and used to prioritize sidewalk repair projects.

The survey, which will take about three months to complete, will be repeated every two years. The ATV, driven by a technician, will be traveling seven days a week in commercial areas from 6 a.m. to 10 a.m. or until businesses are open; and in residential neighborhoods from 8 a.m. to 6 p.m. The survey is being conducted for the City by IMS Infrastructure Management Services, LLC. Please call Public Works Customer Service with any questions, 310-285-2467.
