

# PROJECT NOTICE

Dear Resident,

The City of Beverly Hills has initiated a contract to have the Robinia trees on North and South Hamel Drive replaced. The Robinia trees have struggled to thrive on several streets in the City and have been replaced. At present, approximately 30% of the street tree sites on the street are vacant, due to trees declining.

The project will begin with the planting of currently vacant sites. Immediately thereafter, the remaining Robinia trees will be removed and replaced. The project includes approximately 90 tree sites. The replacement tree is 'Drake' Chinese Elm. The Drake Elm has been used successfully to replace Robinia trees on Peck Drive and on the 100-300 blocks of North Elm Drive

What to Expect:

- Tree crews removing and planting trees
- Moderate on-street parking impacts
- Moderate noise levels 8 AM - 4 PM
- Weekly water truck visits for one year

## Project: Hamel Drive Tree Replacement
