We are in Drought—Please do your part!

California is in an extreme drought! We must all do our part to use water efficiently. Please help Beverly Hills with our conservation efforts with these two easy tips:

TIP #1: Indoor water use is only about 55 gallons per person per day. That means the best way to reduce your water use is by watering your landscape efficiently.

1. Approximately eight minutes for overhead sprinklers and approximately 15 to 20 minutes for drip. Getting the water deep in the soil is key.

2. Check every sprinkler head monthly to ensure they are not broken, clogged or watering the sidewalk.

3. Place a back-up battery (typically a 9-volt) in the back of your controller in case the electricity ever goes out.

TIP #2: Sign up for the City’s FREE Water Tracking program to know if you have water flow issues. Running toilets are the #1 cause of water waste and can waste up to 200 gallons an hour.

For more information, please call 310-285-2467 or email AskPW@beverlyhills.org.

Practice and share these tips with friends and family! For more information, visit BHSaves.org or call 310-285-2467.

2021 Holiday Décor

The Public Works Department is busy coordinating the citywide holiday décor and lighting program as part of the City’s capital improvement program. Staff began working on the design concepts in May of this year and are excited to provide the community with updated lighting and décor along with some brand new décor elements for this holiday season.

The Rodeo Drive Holiday Lighting Celebration will return this year on November 18, 2021 from 5 p.m. - 8 p.m. and officially kicks off the City’s exciting holiday decor with evening festivities and a fireworks show.

View sparkling lights spanning across Wilshire Boulevard, North Canon Drive and North Beverly Drive and look for the newly updated Santa and Reindeer display flying over Wilshire Blvd at Beverly Drive! Beverly Cañon Gardens will have a playful walk-through Elf Tree as well as a light tunnel and, last but not least, the Lily Pond at Beverly Gardens Park will be filled with nearly 200 Glowing Reeds which will come to life each night with a coordinated light and audio show. Hanukkah this year will be featured with the nightly lighting of the menorah, blue and white lights on the lights spanning Wilshire Boulevard, blue and white ornaments in the light tunnel at Beverly Gardens Park, and a special Hanukkah Glowing Reeds Audio & Light Show at the Lily Pond from November 28th through December 6th. Public Works Staff will manage the installation and make sure that each street and park meets the electrical needs of the décor. In-field staff will also ensure that the City looks its best to welcome residents, businesses and guests with clean and attractive streets and sidewalks.

The City décor and lights will be on display November 18 through January 1. The Glowing Reeds Audio & Light Show will take place nightly at 6 pm, 7 pm, and 8 pm…with a bonus 9 pm show on Thursday, Friday and Saturday nights.
HHW Was a Success

On September 25th, the City hosted its annual Household Hazardous & Electronic Waste (HHW) drive-thru collection event. The event drew over 700 hundred cars. Public Works would like to thank the community for their commitment to keeping our environment clean by properly disposing of their hazardous and electronic waste.

OTHER REMINDERS:

During the holiday season, the City’s solid waste collection service will not take place on Thanksgiving, Christmas, and New Year’s day. Trash service will resume the following day. For instance, if your normal trash pick-up is on Thursday, service will be provided on Friday and so forth.

Proper Christmas Tree Disposal
Please remove all ornaments and decorations; remove stand/base and place the tree next to your trash bin for collection. Christmas trees are collected during your normal trash pick-up days.

Purchasing New Holiday Lights
Consider ENERGY STAR Certified LED’s! LED light strands use 75% less energy than conventional incandescent bulbs and last up to 10 times longer! They also remain cool to the touch and reduce fire risk.

Leaving town for the Holidays?
If you have a gas water heater, turn it to “Pilot” or vacation setting when you are out of town. If you have an electric water heater, shut off the circuit breaker. This action prevents energy loss and increase savings. Learn about residential programs and tips to help you save money and energy by visiting SCE.com and SoCalGas.com
