CITY OF BEVERLY HILLS TELECOMMUNICATIONS INSTALLATION

APPLICATION REQUIREMENTS CHECKLIST (Please check box for each item)

1) Architectural Plans (6 sets of plans) shall include the following:

- Location Map of the site
- Site Plan drawn to scale
Include existing improvements on the site (e.g., buildings, structures, landscaping, and if applicable, the location and type of other wireless providers' at the site)
- Floor Plan and Elevation drawings (include all dimensions of antenna and equipment; floor plan shall describe antennae and equipment locations)
- Roof Plan (if applicable)
- Description of support structures (e.g. detail drawings, mounting method, profile or cross-section diagrams)

NOTE: If submitting a site plan and/model for public distribution purposes per SB 1214, please indicate that on relevant drawings.

2) Code Compliance Clearance Review

- Go to the Building & Safety Division for code compliance clearance review and have TWO of the sets of plans stamped by a Plan Review Engineer (PRE). (*This review is not a permit, and may take more than one day depending on the complexity and extent of your proposal.*)

2) Site Photos and Photosimulations (3 sets)

- Existing site photographs and photosimulated images of the proposed facility.

3) Property Owner Authorization

- Authorized Property Owner Signature (provided on application) or Letter of Authorization

If the site is proposed on City property, on the public right-of-way, or on easement property, the City's review will include authorization. Additional notification and authorization may be required dependent upon location of the site.

4) A Report that includes the following:

- Information that states that the proposed facility at the subject location will meet RF (radio frequency) human exposure guidelines, in accordance with ANSI and FCC requirements.
- Statement regarding non-interference with other existing systems
- Type of communication service to be provided (e.g., voice, video, data, fixed-wireless, broadband, PCS, etc.)
- The nature of the particular site/route, how it fits into the wireless provider's network system.

- The extent of the existing and proposed coverage, include future plans for expansion in the City of Beverly Hills
- Provide an RF-approved (Radio Frequency Engineer) Coverage Map that illustrates the existing sites how the proposed site extends/improves the coverage for the area.
- The frequency and method of equipment inspection and maintenance.
- Identify if the building owner and telecommunications company is willing to accommodate the co-location of other telecommunications antennae

Note: Architectural (Design) Review may be required, which include application fees. Please consult with Planning Division staff regarding the Application and Fee Schedule.
