Understanding Your Owner Profile

Default Screen
When you select the Landlord profile you’re taken to a page with two tabs: “Owned Properties” and “Previously Owned Properties”. First time registrants, or anyone who hasn’t registered a property will not see any Properties listed.

Alternatively, returning owners see properties they registered during 2017 registration or through a subsequent Owner Change Amendment.

If you have any questions at any time, call Beverly Hills Rent Stabilization at (310) 285 – 1031.
Owned Properties
The “Owned Properties” tab shows properties added to your profile during the previous registration or through a “New Ownership” amendment (covered in a separate section). “Owned Properties” is where you “Add a Property” to your profile. To remove a property, you must submit a Change in Ownership Amendment.
Previously Owned Properties
The “Previously Owned Properties” tab shows properties previously associated with your profile. Properties appear here after you submit and staff approves a “New Ownership” amendment. You don’t have access to current data on properties you no longer own. Past owners of your property will have no access to the properties you currently own.
