3. Status update for the Water and Wastewater Cost of Service Study
HF&H Consultant Rick Simonson briefly reviewed last week’s meeting regarding the calculation of the estimated sewer flow. He presented refined calculations, the mass balance results and their recommendations. Senior Vice Presentment from HF&H John Farnkopf presented the examples of flow factors and rate structure approaches from surrounding communities. Bill comparisons for one month and three months were discussed.

The Commission commented and gave feedback.

Motion: MOVED by Commissioner Greer, SECONDED by Vice Chair Nystrom that the Public Works Commission:

1. Support the proposed policy recommendations, which separate the residential wastewater customers (single-family and multi-family) and add a quantity (volumetric) charge for the single-family and multi-family classes using the sewer factor that assumes the three-year one month calculation that comes to 52% per single family as the sewer return;

2. Support the proposed change in the commercial wastewater customer classes to include a third class;

3. Support water CIP scenario 2 to recommend to City Council;

4. Support the fixed charge revenue ratio for water;

5. Support the pass-through charges, outside city differential, water reliability charge, and water shortage revenue stabilization factors; and

6. Recommend that City Council begin the required Proposition 218 public notice process for rates based on the cost of service studies (4/0).
