

## Appendix III: Respondents' Ideas for Innovation

This appendix highlights respondents' ideas for using data and technology to improve City operations and customer service-delivery. We should note that some themes, such as: 1) the use of Microsoft Teams or similar software for productivity and collaboration; and 2) using online, app based, and/or cloud-based environments and paperless systems for completing financial transactions and administrative paperwork, were recurrent in the survey comments. Also, respondents suggested training (including cross-training and training in productivity and online based software) as well. The survey questions were:

- **Question 18:**

When thinking about the future of Beverly Hills, idealistically, how could the use of data and technology improve your ability to do your job and improve customer service-delivery? (Please provide specific examples if you have any)

- **Question 19:**

Assuming resources were plentiful, and the organizational culture was supportive, do you have any innovative ideas you would seek to explore/pilot/implement in your department to improve operations and customer service-delivery?

## Respondent Ideas for Improving City Operations and Customer Service-Delivery

	Automation	Cloud & Secure Information	Collaboration and Productivity	Customer Friendly	Information and Transparency	MUNIS System Review and Upgrades	Permits	Recruitment	Retention	Touchless Commerce	Virtual Environment
<b>Interviewing Process</b>											
<ul style="list-style-type: none"> <li>• Continue offering remote testing (online) and interviewing opportunities               <ul style="list-style-type: none"> <li>○ Creates more flexible recruitment experience</li> <li>○ Experiencing better attendance and punctuality from candidates during remote interviewing</li> <li>○ Allows testing of a larger number of people with a quicker turnaround time</li> <li>○ Losing fewer candidates since non-local candidates and those who typically cannot miss work can test on their own time (e.g. during evening hours)</li> </ul> </li> </ul>		X		X				X			X

	Automation	Cloud & Secure Information	Collaboration and Productivity	Customer Friendly	Information and Transparency	MUNIS System Review and Upgrades	Permits	Recruitment	Retention	Touchless Commerce	Virtual Environment
<b>Use of Microsoft Teams or Similar Platforms</b>											
<ul style="list-style-type: none"> <li>Invest in Microsoft Teams or other collaborative platforms</li> <li>Investing (e.g. purchasing full license) would:               <ul style="list-style-type: none"> <li>Allow employees to make calls from Microsoft Teams account                   <ul style="list-style-type: none"> <li>Multiple respondents expressed concerns about personal cell phone use while teleworking</li> </ul> </li> <li>Boost productivity by creating capacity for multiple staff to edit documents in One Drive simultaneously (e.g. Google Docs)</li> <li>Fully utilize Microsoft tools such as One Drive, Teams, etc. and leverage needed tools</li> </ul> </li> </ul>		X	X	X							X
<b>Permitting System</b>											
<ul style="list-style-type: none"> <li>Add City demographics and statistics and/or add existing/available data to parcel data in the City's permitting system – City Smart               <ul style="list-style-type: none"> <li>According to survey feedback, mistakes observed in City Smart                   <ul style="list-style-type: none"> <li>The system could be improved by making data more reliable and creating flexibility with the types of data that can be input</li> </ul> </li> <li>Adding data could improve customer service by making information available to customers and cutting down on delivery time</li> </ul> </li> <li>Improvements needed for inefficient and troublesome permitting and plan review programs</li> <li>Implement a more user-and customer-friendly Electronic Plan Review and Permitting system               <ul style="list-style-type: none"> <li>Current system requires staff training on troubleshooting and requires extensive support for customers to use the system</li> </ul> </li> <li>Provide customers access to city records and permit documents online to conduct their own research               <ul style="list-style-type: none"> <li>Would reduce inquiries to City staff</li> </ul> </li> </ul>				X	X		X				

	Automation	Cloud & Secure Information	Collaboration and Productivity	Customer Friendly	Information and Transparency	MUNIS System Review and Upgrades	Permits	Recruitment	Retention	Touchless Commerce	Virtual Environment
<ul style="list-style-type: none"> <li>○ An example would be the ZIMAS system implemented by the City of Los Angeles<sup>1</sup> <ul style="list-style-type: none"> <li>▪ System provides property and permit info to customers on every property</li> <li>▪ Tools provide better customer service and saves staff time</li> </ul> </li> </ul>											
<b>411 Customer Line</b>											
<ul style="list-style-type: none"> <li>• Create dedicated 4-1-1 customer service line</li> <li>• Have a 411 type of customer service line for the whole City <ul style="list-style-type: none"> <li>○ Envisioned Process <ul style="list-style-type: none"> <li>▪ Customer Service Representatives (or dedicated concierge) would answer all incoming calls</li> <li>▪ They would be trained to answer most general questions and provide direct answers to most of the requests &amp; inquiries</li> <li>▪ Only specific concerns/request transferred to department/staff direct extensions</li> </ul> </li> <li>○ Potentially more efficient and may provide better customer service to the community <ul style="list-style-type: none"> <li>▪ Residents have trouble navigating website and identifying correct extensions for their requests</li> <li>▪ Callers get frustrated when told they called the wrong number and need to be routed to another line</li> </ul> </li> </ul> </li> <li>• Shorten auto machine narratives for City Hall (existing messages)</li> </ul>				X	X						

<sup>1</sup> We did not conduct any follow-up research on the ZIMAS system.

	Automation	Cloud & Secure Information	Collaboration and Productivity	Customer Friendly	Information and Transparency	MUNIS System Review and Upgrades	Permits	Recruitment	Retention	Touchless Commerce	Virtual Environment
<b>Online Platforms and ERP Modules</b>											
<ul style="list-style-type: none"> <li>Stay current on construction software platforms such as Building Information Modelling (BIM)<sup>2</sup></li> <li>Eliminate standalone modules that are not part of the citywide ERP system and invest efforts and resources to expand existing system               <ul style="list-style-type: none"> <li>Example:                   <ul style="list-style-type: none"> <li>Allow inventory modules to be linked to purchasing and accounts payable, timekeeping systems with payroll, and capital assets with CIP project ledger</li> <li>Have inventory modules feed into work order system using GIS tracks, tracks/reports repair needs, job status, and that post results to public</li> </ul> </li> </ul> </li> <li>Create more online platforms for applications, forms, permits and other needs which could be more user-friendly for the community               <ul style="list-style-type: none"> <li>Including smartphone applications that provide GIS/zoning information and access to City's permitting system</li> <li>Including chat services to connect to library patrons at the time they need assistance</li> </ul> </li> <li>Fully digitize records               <ul style="list-style-type: none"> <li>Including historical collection materials (books and newspapers)</li> </ul> </li> </ul>		X		X	X	X	X				X
<b>Data Dashboards</b>											
<ul style="list-style-type: none"> <li>Include City demographics and statistics in a dashboard               <ul style="list-style-type: none"> <li>Data is often requested by Commissions and the City Council to assist in decision-making on existing/new regulations</li> <li>Data should be more readily available to city residents/staff/decision makers, perhaps collected and distributed by the city</li> <li>Data can illustrate the volume and nature of calls received from residents and be used to analyze the trends among what our residents want/need</li> </ul> </li> </ul>				X	X						

<sup>2</sup> We did not conduct any follow-up research on construction software platforms.

	Automation	Cloud & Secure Information	Collaboration and Productivity	Customer Friendly	Information and Transparency	MUNIS System Review and Upgrades	Permits	Recruitment	Retention	Touchless Commerce	Virtual Environment
<ul style="list-style-type: none"> <li>City started an Open Data initiative a couple of years ago               <ul style="list-style-type: none"> <li>Would like to see it gain more traction</li> <li>Also, identifying who holds what data and where can make the City more transparent internally and externally</li> </ul> </li> </ul>											
<b>Payment Options and Customer Transactions</b>											
<ul style="list-style-type: none"> <li>Fully eliminate paper: first EE paper checks, manual printed pay advices, transition all payments to online platforms, or at least payment kiosk that will eliminate the need for cashiers and parking attendants</li> <li>Streamline payment of invoices for vendors, consultants, and contractors</li> <li>Use of touchless technology and mobile apps to transact city services would be an improvement</li> <li>Elderly customers could make a phone call to pay their bills instead of coming into the city</li> </ul>		X		X		X				X	
<b>Public Participation</b>											
<ul style="list-style-type: none"> <li>Continue virtual element of City Hall meetings               <ul style="list-style-type: none"> <li>Allows people to attend even if they cannot come to City Hall and wait for their item(s) to be heard</li> </ul> </li> </ul>				X							X
<b>Automation</b>											
<ul style="list-style-type: none"> <li>Automate services               <ul style="list-style-type: none"> <li>If task involves paper or computer and is repetitive, can probably automate in part or in whole</li> <li>If task does not provide all necessary information up-front                   <ul style="list-style-type: none"> <li>Example:                       <ul style="list-style-type: none"> <li>Dog park registration does not record addresses for non-residents</li> <li>Requires staff to email registrants for their address prior to mailing them key fobs</li> </ul> </li> </ul> </li> </ul> </li> </ul>	X			X							

	Automation	Cloud & Secure Information	Collaboration and Productivity	Customer Friendly	Information and Transparency	MUNIS System Review and Upgrades	Permits	Recruitment	Retention	Touchless Commerce	Virtual Environment
<b>Other</b>											
<ul style="list-style-type: none"> <li>• Use of Live Video for Inspections               <ul style="list-style-type: none"> <li>○ Deployment of cameras at jobsites or live stream handheld cameras could greatly improve our ability to telecommute</li> <li>○ Live video can help the interaction with the Public Works inspectors and contractors to solve project issues or problems</li> </ul> </li> </ul>			X	X			X				X
<ul style="list-style-type: none"> <li>• Contract out a team to respond to and write 5150 holds for psychiatric emergencies               <ul style="list-style-type: none"> <li>○ Currently police write the holds which takes the patrol out of service for too many hours</li> <li>○ Holds also require training</li> </ul> </li> </ul>			X								
<ul style="list-style-type: none"> <li>• Link COVID tracking forms to keycards               <ul style="list-style-type: none"> <li>○ Keycards are way to control access and identify who is in City facilities</li> </ul> </li> </ul>	X										
<ul style="list-style-type: none"> <li>• Community Development, Public Works, and IT collaborate to implement digital street signs on parking meters or signposts wherein regulations or announcements could be changed remotely               <ul style="list-style-type: none"> <li>○ Would no longer need to post temporary cardboard signs on meters</li> <li>○ Communicate temporary parking regulations/announcements can be communicated faster to customers</li> </ul> </li> </ul>	X			X
